

L.E.F., Inc

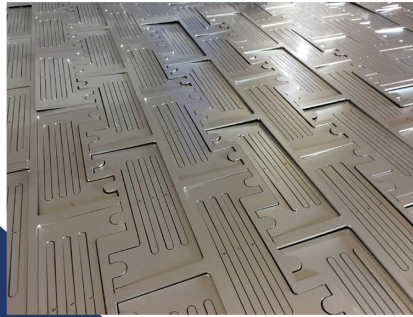

LASER PROCESSING AND METAL FABRICATION

Our Story

L.E.F., Inc. is a multi-service specializing in laser processing and metal fabrication. We were the first company in 1987 to introduce the Tulsa area to laser technology. Today over 20 processes are performed under our roof including laser cutting, laser marking, bending, forming, machining, welding, powder coating and sand blasting.

OUR SERVICES

Laser Cutting & Marking
Powder Coating
Bending & Forming
Machining & Welding
Plasma Cutting & Oxyfuel/Flame

L.E.F., Inc.'s list of equipment is numerous, versatile, and updated which allows us to adjust precisely to customer needs. We can process carbon steel, stainless steel, alloys, aluminum, brass, copper, plastic, and many synthetics (MSDS required), AWS & ASME certified welders, MIL-I-54208A ISO 900 Standards.

We are your most efficient and cost effective options available.

With over 20 processes, we are truly your "one stop" fabrication facility.
